

Blockchain

DIGITAL CAPITAL

ABOUT US

We are a blockchain developer company that created relevant financial solutions.

The founders of Blockchain Digital Capital believe that blockchain technology, cryptocurrencies and smart contracts are revolutionary innovations that are already changing the global financial system and that everyone should have the opportunity to participate and benefit from this transformation.

01.

We help anyone benefit from the cryptocurrency market, safely and easily, with no special knowledge required.

02.

We offer the opportunity to enter a unique business where anyone can build their business anywhere in the world with high commissions received in ETH and without any obligations.

MOTIVATION

When Blockchain Digital Capital was created, the founders were driven by the goal of giving people a simple, human-centric solution that anyone can use to build wealth in the digital currency market.

ENTERPRISE ETHEREUM ALLIANCE

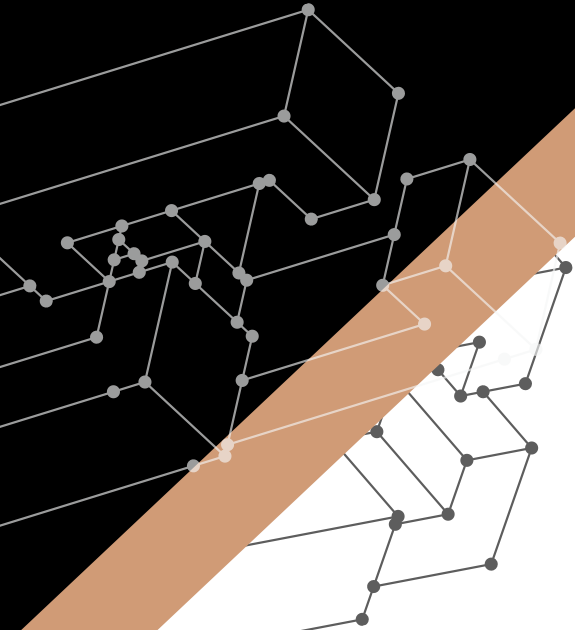

Blockchain Digital Capital is a member of EEA, along with many other global companies such as Microsoft, JP Morgan Bank and FedEx. All members are audited annually. Only companies that make serious and real developments on the blockchain and guarantee the security of their users can be members of the alliance.

MULTI-LEVEL MARKETING ON THE BLOCKCHAIN

The uniqueness of the company comes from the fact that it is the first and only Multilevel Marketing company operating on a blockchain.

The founders chose multilevel marketing as a business model because it allows them to help as many people as possible achieve prosperity and financial independence.

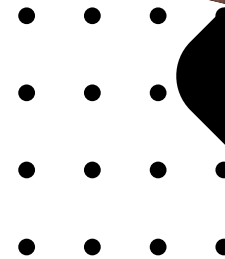

After purchasing a license, you will have the opportunity to recommend the company and its products to others. Like the investment products, the referral program is also controlled by a smart contract.

"You can get rich alone, but how much more exciting and rewarding it is to do it with others."

CRYPTOCURRENCY? YES!

Cryptocurrency, or digital currency, is simply the next stage in the evolution of money. But whereas traditional money is controlled by issuing states (centralized), digital money is operated by a blockchain and a huge group of users, sometimes hundreds of thousands of users who do not know each other (decentralized).

WHY IS BLOCKCHAIN SO GOOD FOR US?

A blockchain is a database. It differs from a traditional database in a way that the information is not stored on a central server, but on a distributed network. Anyone can connect to the network and the data is public, anonymous and accessible from anywhere in the world. More importantly, anything that is published on a blockchain (e.g., a transaction or a smart contract) is cannot be changed afterwards and cannot be hacked.

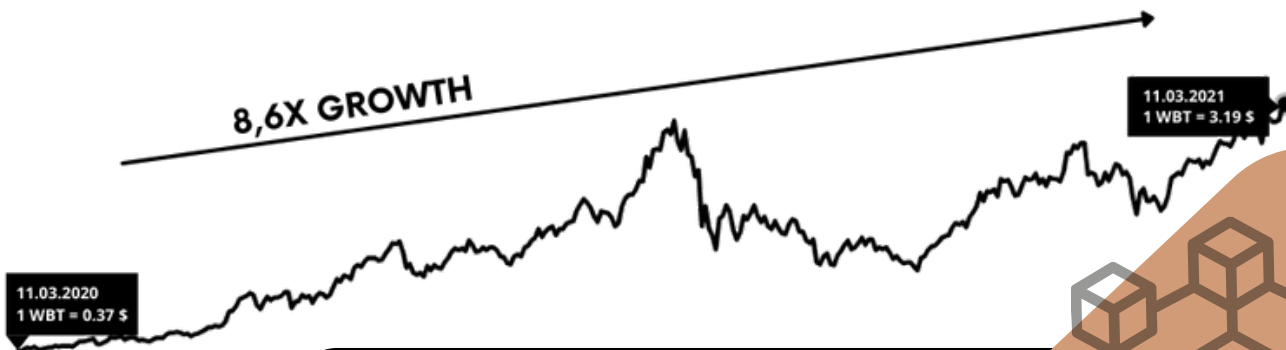

SAFE INVESTMENT

The company's main product is the Wealth Builder Token which is basically an investment package, where a smart contract adjusts the composition of the cryptocurrencies, so you don't have to do anything. The smart contract monitors the price changes 24 hours a day for you.

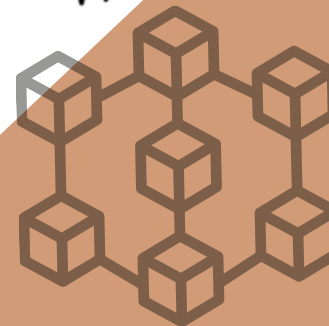

In fact, the company has created an automated portfolio powered by smart contract where you don't invest your money in a single digital currency with huge risk, but you buy yourself into the entire cryptocurrency market!

WBT price in USD

8,6X GROWTH

WBT always keeps your money in the most valuable cryptocurrencies, using the world's only smart contract developed by Blockchain Digital Capital. We don't need to watch the prices and the stock markets, the smart contract does it for us.

Buy & Hold strategy in a smart contract - the company's strategy is to invest for the long term (min 2-3 years), eliminating short-term market fluctuations.

The WBT reflects the average value of cryptocurrencies, thus it also has an exchange rate, which is set in dollars. Over the past 1 year, the price of WBT has increased by 8,6x.

SMART CONTRACTS

Everything, the company's products and processes are also governed by smart contracts.

Simply put, smart contracts are programs stored on a blockchain that are executed when predetermined conditions are met. They are typically used to automate the execution of an agreement so that all participants can be immediately certain of the outcome, without the involvement of any intermediaries or loss of time.

INVESTMENT + INSURANCE

A distinct product of the company is WBT supplemented by a health insurance, called Accumulation Protection Token (APT). It is a 10-year-long combined savings plan that includes WBT with the TOP 20 digital currencies and an insurance that provides protection in case of oncological diseases or accidental death.

The saving is in your wallet all the time, the company does not use the money invested, but provides a safe place to store it. WBT is liquid, so you can withdraw the money at any time.

WHY THE BDC BUSINESS?

- There are no mandatory purchases, there is no reset to zero, which is a characteristic of most Multinível Marketing businesses.
- There are no physical products, you just have to promote the opportunity.
- You don't have to reach a certain level every month, you can work as much as you want, it's all up to you.
- After selling a referral license or any of the investment products you will receive your commission in ETH, a dynamically growing cryptocurrency.
